### 10. Marjorie Blaylock

age: 39

IQ: 133

health: poor

education/training:

medical school grad

work exp: 10 years general family medical practice.

## "Five Must Die"

Twelve people are in a nuclear bomb shelter museum when a nuclear holocaust occurs. The shelter is real but since it is a museum it is only stocked with supplies for 7 people. If five people don't leave, the supplies will be used up before the radiation levels are safe.

Choose carefully and wisely.

Choose the people who you will ask to leave the nuclear and go to certain death. The human race must endure!
